Investment objectives: Target Date Funds offer investors an easy way to own a diversified portfolio by making a single mutual fund selection that changes over the years to reflect the investor's capacity risk.

For a long-term target date, the fund comprises a more aggressive mix of underlying equity index funds in the early years. As the target date grows nearer, it is adjusted toward a more conservative mix. When a fund reaches its target date, the underlying portfolio will reflect that of the Vanguard Target Income Fund.

The funds do not guarantee a certain return at their end date, but they do automatically reduce the amount of risk in the portfolio as the date the funds will be needed draws nearer.

Fees and expenses: Vary from 0.13 to 0.15% per year

Right to alternative investment. If the Plan invests some or all of your directed accounts in the default investment, then you have the continuing right to direct the investment of your directed accounts in one or more of the other investment choices available to you as explained above. You may change your investments.

No transfer fees or expenses will be charged if you elect an alternative investment within 90 days after first being subject to the default investment. However, your account will be adjusted for any investment gains or losses. If you elect to transfer to an alternative investment after the 90 day period beginning on the date of your first elective deferral, then the following fees and/or restrictions will apply:
